

THE TRUCK TRANSFORMER!

By Simpson Innovations Inc

WHAT IS IT?

The Truck Transformer is an innovative truck body swapping system that allows you to **exchange truck bodies in less than ten minutes!**

WHY?

Streamline your production! One truck can now perform the functions of several trucks without the added cost of insurance and maintenance, etc. **One person can safely** and simply load and unload a variety of truck bodies resulting in a highly efficient vehicle.

One truck transformer equipped vehicle can **function as a flat-deck, cube van, crew bus and hybrid motor home and more**, giving you much more than just basic transportation.

SYSTEM FEATURES

- **The Truck Transformer** body swapping system is designed for present* day Ford, GM and Dodge ¾ and 1 ton long box pick-up frames with all cab configurations. *Check with Simpson Innovations for details.
- System fits 2 and 4 wheel drive trucks.
- Loads and off-loads fully loaded bodies up to 2700 KG (6000 lbs) from ground level.
- Swap bodies in under 10 minutes. Off-load in 3.
- Reduces double handling and unnecessary unloading of product from body.
- Operator friendly toggle control.
- Two component system: the loader attached to the truck and the under-body adapter attached to the body.
- The truck mounted loader system weighs 180 KG (400 lbs); the same weight as the original pick-up box.
- Equipped with auxiliary mudguards and tail lighting the unit is road legal
- The truck body is lockable to deter theft

FLAT DECK

- Load equipment and material with ease from ground level eliminating the need for loading docks.
- Leave deck and load at job site for unloading while delivering or picking up other loads.
- Productivity increases without driver or truck down time.

CUBE VAN

- Cube van body can operate as a courier/delivery van or service/trades van.
- Offload this at a job site and you have a ground level secured storage unit.
- Can be used as a job site office or first aid station.

TRUCK BODY WEIGHTS*

Flat Deck	540 KG	1188 lbs
Cube Van	840 KG	1848 lbs
Logger's Box	645 KG	1419 lbs
Crew Bus	1210 KG	2660 lbs
Motor home (Hybrid)	1455 KG	3200 lbs

*base units

HYBRID MOTOR HOME

- Selection of 4 x 4 vehicle allows off-road camping.
- High ground clearance.
- Innovative design enables the motor home to be off loaded directly to the ground. This allows for easy one-step access.
- Alternative to a class 'C' Motorhome with convenience of a multi-purpose chassis.
- Hot water tank and batteries are located at floor level and are accessible from the exterior.
- Storage space below the truck frame ensures an extremely low center of gravity.
- Rear slide-out increases living area to 8' wide by 13' 4" long.
- Unit is self contained complete with batteries, propane stove and 2-way fridge.
- Large washroom with shower/tub.
- Many options available such as flat-screen TV, CD player, Fan and sky-lite.
- Sleeping bunk is North – South layout.

COST SAVINGS

- **One vehicle** can be used for pleasure and work. Eliminate a second or seasonal vehicle.
 - ✓Capital cost savings.
 - ✓Depreciation savings.
 - ✓Lower insurance costs.
 - ✓Lower maintenance costs.
- With minimal maintenance the Truck Transformer loader system will outlast several vehicles.
- The system is transferable when upgrading vehicles.
- Reduce on and off product loading time and expense by using body for transport as well as storage.
- Lease plan available.

WARRANTY

The **Truck Transformer** carries a 2 year limited parts and labour warranty
